## 2T2R reference design circuit Connected to HOST CPU WLAN 50 Ohm RF trace 2.4G ANT NOTE: Default is AP62X2, module pin12 is PA\_PU, If using AP6354/AP6356S/AP6359S, module pin12 is no connected. If using AP6359S,module PIN48 is BT\_ANT If using AP62X2/AP6354/AP6356S,Pin48 is no connected, just floating вт NOTE: The output current limit must be larger than 700mA for internal PA, if using AP62X2. LPO NOTE: L1, rated current 1A expectation specification. NOTE: Default is AP62X2, If using AP6354/AP6356S/AP6359S, module pin37 is no connected, remove block A components. NOTE: If WiFi interface is SDIO v3.0, the VDDIO must be 1.8V.
